Address: Ruai, Nairobi

Objective

Motivated and detail-oriented Software Development student at KCA University with hands-on experience in full-stack development, API integration, Web3 technologies, and UI/UX design. Seeking a software development internship or junior role to apply and expand my skills in a real-world setting. Passionate about building decentralized, user-centered web applications using modern and emerging technologies.

Education

Bachelor of Science in Software Development
KCA University, Nairobi
Expected Graduation: 2025

Technical Skills

Languages & Frameworks

- JavaScript (ES6+), Python, Solidity, SQL, R,
- HTML5, CSS3, React.js, Node.js, Express.js, Vite

Web3 & Blockchain

- Ethereum Smart Contracts, Solidity, Hardhat, MetaMask Integration
- IPFS, Web3.js, Ethers.js, Decentralized Identity & dApp Architecture

Tools & Technologies

- PostgreSQL, REST APIs, JWT Auth, Git & GitHub, Thunder Client, Jupyter Notebook
- Adobe Photoshop, VS Code

Soft Skills

- Problem Solving, Collaboration, Agile Workflow, Critical Thinking

Experience

- Software Development Attache – Impax Business Solutions LTD
May 2025 – August 2025
 - Participated in SME-focused projects and supported business systems development.
 - Gained practical exposure to ERP platforms, Microsoft Dynamics 365 Business Central, and reporting automation.
 - Contributed to solution prototyping, internal tool improvements, and documentation.
- Freelance Web Designer – Remote
Jan 2024 – Present
 - Designed responsive websites using HTML, CSS, and JavaScript for various clients.
 - Delivered custom web solutions and provided branding support using Adobe tools.
- Personal Project – Shift & Attendance Management System
Mar 2025 – Present
 - Developed a hospital-themed full-stack web app using React, Node.js, PostgreSQL.
 - Implemented JWT authentication, shift scheduling, real-time metrics and payroll logic.

Academic Projects & Simulations

- Fake News Detection – Python, Jupyter Notebook
- Embedded System Simulations – RIMS, Arduino IDE, Tinkercad
- Blockchain Voting dApp Prototype – Solidity, IPFS, MetaMask (Conceptual)

Interests

Web Development • Blockchain & Smart Contracts • Embedded Systems • Creative Design • Gaming • AI & Automation

Passions

I am passionate about decentralization, open-source technologies, and building solutions that empower users. I love exploring how blockchain and Web3 innovations can reshape industries, improve transparency and create secure digital ecosystems.
